Model DB7-H Universal Stringing Block 7 Inch

The DB7-H universal stringing block is made of A356-T6 aluminum alloy providing a 2,500lb safe working load and up to 2" diameter cable. Interchangeable with most common fittings and adapters for crossarms and insulators, the DB7-H has 90 degree mounts on the sides and underneath. Spring loaded gate opening allows for hotstick use with the ability to lock in the open position for easy removal of the conductor. Optional urethane lining available.

Specs:

7" O.D, Rim Width 3", Throat Width 3 1/8", Throat Height 3 3/4", Safe Working Load 2,500lbs, Weight 9.3lbs

7A and 7C Crossarm Brackets Fit Up To 5 3/4" x 6 1/4".

Y-Ball Cevis
